components are typically produced in small volumes. Typical
automotive parts include, for example, front engine, transaxle
mounted, front wheel drive internal combustion engines,
transmissions, transaxle housings, drive shafts, driveshafts,
transfer cases, and transfer case housings. Typically, if a vehicle
has a particular engine, transmission, or drivetrain setup, the
original equipment manufacturer (OEM) determines the best part
or parts for the part to fit and to provide reliable and desirable
performance. An OEM is a company that designs, manufactures,
markets, and/or sells vehicles, motorcycles, parts for automobiles,
